

TE-67L-600 and TE-67L-601 Label Replacement Kits

Parts Included

TE-67L-600 Fahrenheit Kit contains:

- one Fahrenheit label with both single setpoint and liquid bulb thermometer scales
- one Fahrenheit label with setpoint scale
- one warmer/cooler label with warmer/cooler scale

TE-67L-601 Celsius Kit contains:

- one Celsius label with both single setpoint and liquid bulb thermometer scales
- one Celsius label with setpoint scale
- one warmer/cooler label with warmer/cooler scale

Installation

To install the new label, refer to Figure 1 and review the following three steps:

1. Open the access door by pushing down on the pull tab and pulling the door downward. If the unit has a door lock, use the T-4000-119 Allen-head adjustment tool to release the door lock.
2. Do not attempt to remove the existing label. Use isopropyl alcohol (without glycerin) and a soft cloth to clean the surface before applying the label.
3. Carefully align the required label and affix over existing label. Once the label adheres, it cannot be re-aligned.
